## **Effective Homework Guidance**

### **What does research say about homework?**

- Homework is most effective when short and focused.
- Homework should be clearly related to learning in normal school time.
- Homework is most effective when it is an integral part of learning.
- Should be between 1 and 2 hours a night (slightly more for years 10/11).
- Make the purpose of the work clear to kids.
- To maximise impact, it is important that students are provided with high quality feedback on their work.

### **SMART homework!**

- Specific – clear instructions (what to do/how to do it), clear expectations (what do you expect to be submitted).
- Measurable – you should be able to check that is completed.
- Attainable – you should reasonably expect the students to be able to complete the task.
- Relevant – homework should be integrated into your curriculum planning.
- Timely – set according to the homework timetable. 30 minutes at KS3, longer at KS4.

### **Feedback**

- Students should receive feedback on homework.
- No expectation that you should mark homework.
- Students could mark their own work in lessons.
- Could skim responses to find common issues, address these during lesson time.
- Testing on home learning e.g. vocab quiz in MFL.
- Could mark the task yourself.
